***Allowable Subject Matter***

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 18-36 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to teach/show triggering an ignition via an ignition coil without supply of fuel at at least two successive top dead centers of the piston; measuring one of: i) a primary current or a primary voltage of a primary circuit, or ii) a secondary current or a secondary voltage of a secondary circuit, in a measuring period which extends at least over a spark duration after the ignition; comparing measurements of successive top dead centers; and determining, based on the comparison, which of the top dead centers is an ignition top dead center between a compression stroke and a power stroke, and which is a charge cycle top dead center between an exhaust stroke and an intake stroke.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
